Subject: CARB's Draft Scope 1 and 2 Reporting Template

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Lockheed Martin appreciates the opportunity to provide comments/feedback on the draft Scope 1 and 2 reporting templates proposed by CARB in conjunction with SB-253. As a reporting entity that seeks to report at the 'parent' level via the use of another format (i.e., TCFD framework/format), some data reporting elements may not align with the template. For example, the order and some content may differ between the two formats, causing confusion on the completeness of template. Further, there may be information fields such as organization information – names, titles, phone number, and email address (item 12-15) found in the template that may not be available in the alternate reporting frameworks allowable under SB-253. Although use of the template is voluntary in 2026, we are hopeful that CARB considers these reporting variations as immaterial (or even optional data fields), thus not prompting the need for the regulated community to submit separate, nearly redundant data to satisfy both requirements in 2026 and beyond.

If you have any questions or comments, please do not hesitate to reach out to me at michael.g.anderson@lmco.com or 856-266-8926. Thank you for consideration of our comments.

Regards, Mike
